What can pupils and pupil administrators do in TwinSpaces?

Koen - 2026-10-01 - Projects and TwinSpaces

For pupils there are two roles: simply **pupil** and **pupil administrator**.

The default role (pupil) gives access to the whole TwinSpace, including Twinboard, materials, forums, etc.

They also have access to ‘pupil walls’, which allows them to exchange and collaborate with other pupils. Each pupil has a wall per TwinSpace they are part of, and it can be viewed/commented only by members of that TwinSpace. Pupils must start the ‘conversation’ by posting a first message on their own wall for a specific TwinSpace, before other pupils in the same TwinSpace can reply/comment. Pupils can also join and participate in online meetings created by other users within the TwinSpace.

There are some TwinSpace features and permissions that pupils do *not* have:

- Posting updates
- Teacher bulletin
- Creating online meetings and accessing the chatroom (pupils can join and participate in online meetings created by other users, but cannot create new online meetings)
- Adding or managing pages
- Create new forum discussions or threads (but they can reply to existing discussions)
- Inviting new members

The pupil administrator role gives some of the above permissions, specifically:

- Posting updates
- Adding and editing pages (and see draft pages)
- Creating new forum threads (but not discussions)
