How do I register as Student Teacher or Teacher Educator?

Koen - 2025-02-13 - Registration & log-in

The general registration process is described here: [Getting started on the platform](#)

However, Student Teachers (teachers in training) and Teacher Educators (higher education staff who train future teachers) will have to follow some steps specific to their situation. These steps are especially important when the aim is to join eTwinning.

In the attachments you will find the registration process explained for these users.
